company.

we design and run experiments; To build brand love and trust in our company.

We focus on high quality and outstanding service; To ensure a good customer experience and increase brand loyalty.

We create a plan informed by data and insights to create better experiences, influence customer behavior, and develop new solutions to improve performance.

We work on designing and developing in a responsive manner that supports all computers and smartphones. We also focus on smooth interaction with the public and communicating the company's value to the whole world .

We always strive to build and develop everything customers need, according to quality standards and suitability for them. Our company is always convinced that good design and construction give customers complete confidence to buy without hesitation.

We work to provide convenience to our customers, as we are a comprehensive platform for all the design services they need in one place, under the supervision of a specialized and trained team; To ensure quality work and innovative designs.

We maintain exceptional expertise to optimize the direction of the construction process. We also organize the required talent, technology, and organizational change; To enable and then implement new capabilities, as well as choose the right design and colors for the brand.

We rely on the latest technologies and systems powered by artificial intelligence, in addition to visualizing visions and qualifying high-performing talents; To build, test and integrate all capabilities, ensuring speed and agility.

DESIGN

RUN

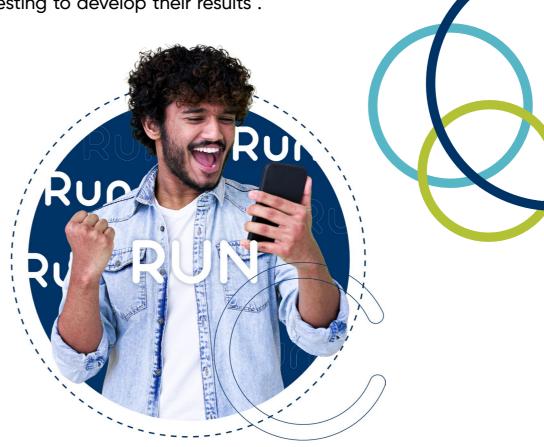

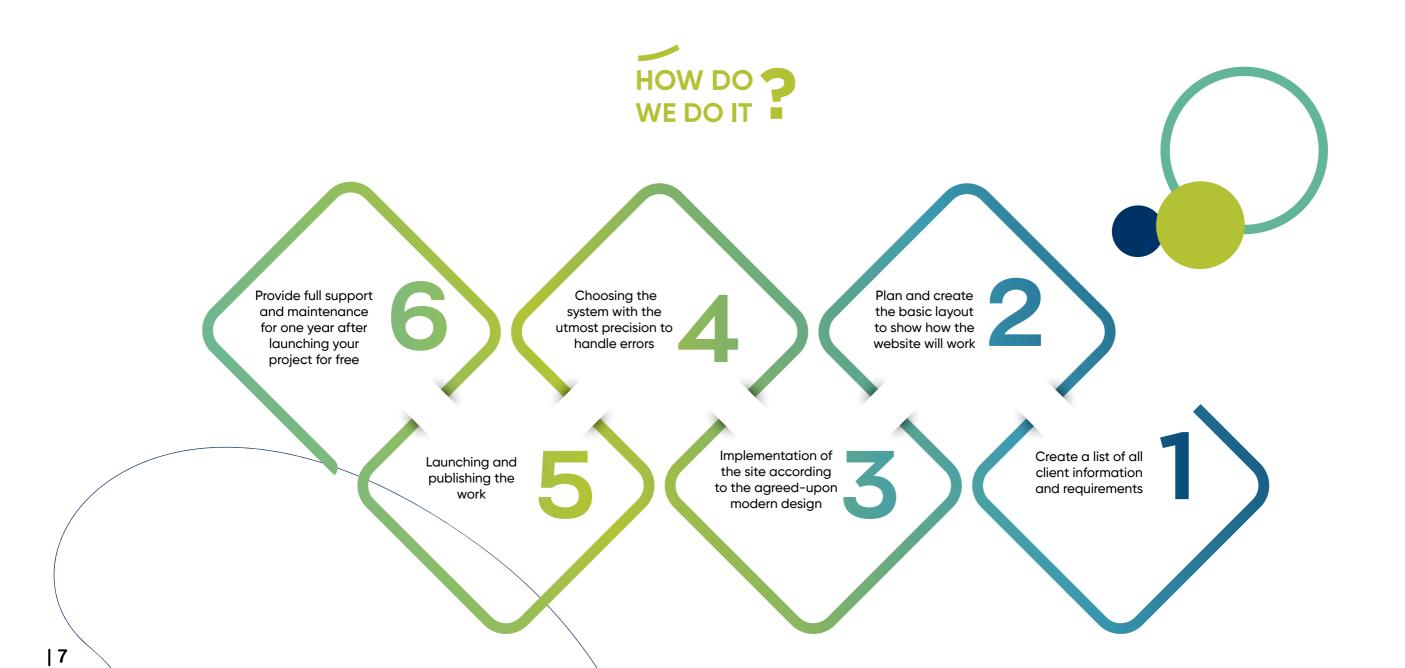

We proceed according to a comprehensive approach that keeps pace with the new era on a large scale, and we are constantly looking for new mechanisms to improve customer experience, and permanent testing to develop their results .

We reimagine business processes throughout the entire journey from start to finish, modernizing and improving them.

We keep pace with change based on our customers, evolving expectations; To ensure that the best and fastest decisions are made based on valuable insights.

We spot problems early, seize good opportunities as they arise, and adapt to experiences.

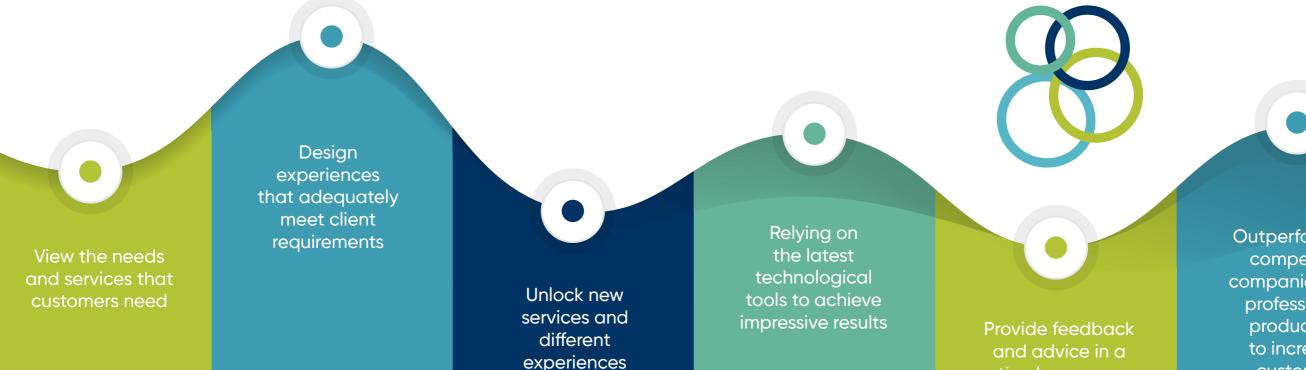

OUR PRINCIPLE

«Our customers are our strength» 000 Commitment good guarantees periodic updates Transparency **Customer Service** unlocking good opportunities Honesty a small cost Innovation Sincerity

OUR GOAL

We reimagine everything for the brands that customers depend on and implement the required modifications through designers and developers who are good at designing attractive websites and smartly developing them.

CONTINUITY

In light of the fierce competition and everyone's quest to win, Tarmeez Tech has no room for error, so we have provided all the strengths for an integrated world that believes in the importance of customer experience.

- We put our customers in the primary place that they deserve while making the decisions that we plan for, as we share them in all steps through continuous communication.
- We include customer feedback in the design and development of their website, and then we make sure that the websites that are created are compatible with their final vision.
- We present our projects in an SEO-friendly manner to make them easier for visitors to use and navigate, in addition to browsing functions that help them find what they are looking for faster.
- We provide permanent technical support to our customers, to help solve problems that they may encounter after the launch, by communicating with a specialized team that works around the clock and is able to quickly absorb any kind of complaints.
- We are distinguished by providing training support to customers who want to learn how to use their website, as we share with them all the steps necessary to manage the content of their website

CUSTOMER EXPERIENCE

We meticulously organize our steps, integrating data strategies that paint a clear picture of customer journeys, make recommendations and test them if they achieve the desired results.

We implement customer requirements and make sure that all modifications are completed accurately, to ensure that they feel satisfied so that they come back again to deal with us.

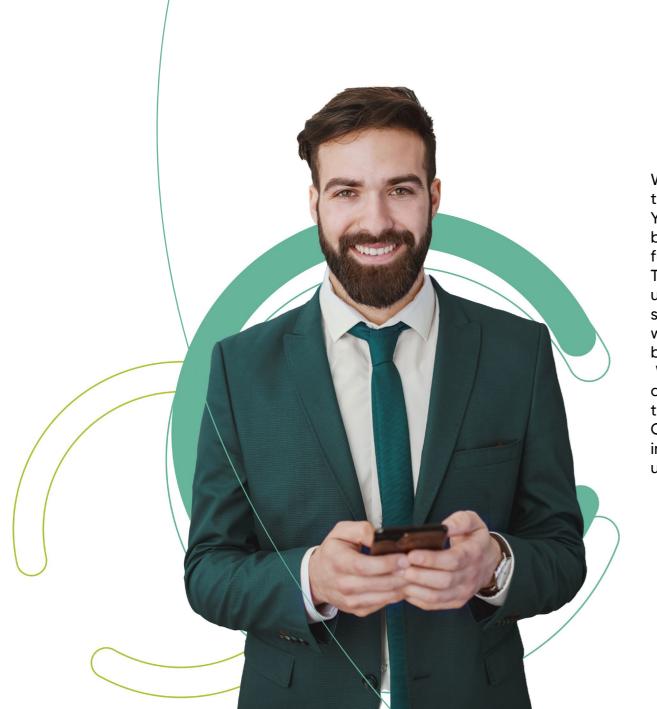

Finally, we were able to create rich personalized experiences and a strong CX strategy, with clear, results-oriented goals.
